

In this workshop, we will make unique multi-media beads to use as connectors, pendants, focals, or any component that you can use in making your jewelry or multi-media project. We will make a polymer clay component but this project can be done with many of your beads, charms, and components that you have already made. Don't we all have a bunch of "I don't know what to do with this" beads sitting around the studio? This is the perfect project for those! We will combine our polymer clay components with wire, silk sari ribbon, lampwork glass beads, glass seed beads... and anything else you want to grab... to make our beautiful unique Multi-Media Silk Sari Beads.
